

# Gravity Water Filters

Clean, Clear, Great-Tasting Water From any Source  
- Without Electricity, Water Pressure, or Chemicals!

Green Hitech's Gravity Water Filter Systems use the power of gravity to pull the water in the upper chamber through the water filters and into the lower chamber. This allows the water to come into contact with our proprietary filter media as long as necessary, removing up to 99.99999% of contaminants (7 log).

## Clear Benefits

**Long-Lasting** One Set of Gravity Filters last for 6,000+ gallons

**Easy Assembly** No plumbing or electrical hookup - sets up in minutes

**Portable** Easy to disassemble and compact storage for trips

**Low Cost** Much less expensive than bottled water

## Filter Elements

**Highly Effective** Removes 99.99999% (7 log) of contaminants

**Long-lasting** Each filter is rated for 3,000 gallons (about 2+yrs)

**Self-regulating** The filters stop flowing when they stop working

**Self-sterilizing** Filters are bacteriostatic, impeding the growth of mold or mildew

This purification element formulation has been tested by State & EPA accredited laboratories to exceed EPA & ANSI/NSF (Std. 53) protocol.

## Compare to Bottled Water

- Less Expensive
- Easier to Store & Transport
- Cleaner, Safer Water

## Versatile & Convenient

Green Hitech's Gravity Water Filter System is useful for many applications, including but not limited to:

- Everyday Household Use
- Camping, Hiking, Hunting & Recreation
- NGO's & Humanitarian Assistance
- Emergency Preparation & Disaster Relief
